## OUR SOLUTIONS THAT WORK FOR YOU

In today's business climate, you are under pressure to reduce costs and deliver higher quality in line with your customer's expectations. To meet your deadlines and quality standards, you need a dependable partner that can offer you services with inbuilt scalability, reliability, cost effectiveness and quality. Over the years, we have consistently delivered results that met or exceeded customer expectations.

You need access to qualified people and technology to attain your high standards. Our team consists of highly qualified managers, content writers, instructional designers, illustrators, animators, information developers and translators. Our training and skills make us the best in the market. We have managed and delivered projects on time and within budget to our customers worldwide.

What is it about our process methodology that makes us better? Our internal processes are designed with three factors in mind; quality, cost and time. These processes are run within every project we undertake, to give you the levels of service that you require.

Whether your requirement is for unstructured documentation or S1000D, DITA, Java, HTML, WinHelp modules, Elearning, CBT, etc., we have the software, platforms and expertise to deliver for you.

We design and develop Engineering products, Web Pages, Wikis, Blogs, Reference Cards and Animated courseware. Our Language Services provides Translation and Localization services to keep your products competitive around the world.

Our highly skilled translators and project managers can translate your valuable information bi-directionally for 250 language pairs.

Our Technical Communication Training Systems are distilled from our extensive academic knowledge and practical experience in technical communication.

Whatever your requirement for skilled personnel, we can provide staff to you on flexible terms.

We offer consultancy, implementation and maintenance for Content Management Systems.

We would be glad to provide more information and answer your questions.
